DETAILED ACTION

Allowable Subject Matter

1. Claims 1-22 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The applicants' arguments stated on pages 7-8 in their remarks, filed on 11/28/2005, were carefully reviewed along with the references cited in the Final Office Action. According to the scope of claims 1, 7 and 15 which recited a system and a method comprising, inter alia, the limitations of receiving and decrypting caller identifier wherein a digital content set is selected from among the one or more digital content sets using the caller system identifier, the called system identifier and the decrypted verification identifier. The decrypted verification identifier or decrypted identifier that verifies the identity of the caller including, according to paragraph [0049] of the Spec., a certificate, code, password, personal identification number (PIN), etc. It is also noted in the Final Office Action, the Encryption/decryption is notoriously well known when transmitting identification data. But combinations of cited references: Bushnell (US. Pat. Pub. #: 2002/0067816), Bierman et al. (US Pat. #: 5,761,279) and Sawyer et al. (US. Pat. #: 6,324,271) fails to clearly teach the feature of, inter alia, "...receiving and decrypting an encrypted verification identifier from the caller system..." wherein combination of "the caller system identifier, the called system identifier and the decrypted verification identifier" are required on the basis of selection of a digital content set from among the one or more digital content sets, as required in the independent claims 1, 7 and 15.
